PROFESSIONAL SUMMARY

Passionate B.Tech Computer Science (Artificial Intelligence & Machine Learning) student with hands-on experience in Machine Learning, Python, Flutter, and Full-Stack Development. Completed an AI & ML internship at MNNIT Allahabad and developed real-world AI applications. Strong interest in Generative AI, Data Science, Mobile App Development, and Software Engineering.

EDUCATION

SR Group of Institutions

Expected Graduation: 2028

B.Tech in Computer Science Engineering (AI & ML)

EXPERIENCE

Innovation & Incubation Hub, MNNIT Allahabad

May 2026 -- June 2026

AI & Machine Learning Intern

- Engineered an end-to-end Loan Approval Prediction System using Python and XGBoost to automate credit assessment workflows.
- Executed exploratory data analysis (EDA), missing value imputation, and feature engineering to enhance model accuracy.
- Developed a responsive web platform integrated with a SQLite database using the Flask framework.
- Containerized and deployed the machine learning model to Google Cloud Run to ensure scalable and reliable cloud hosting.

PROJECTS

Loan Approval Prediction & Analytical AI System

Tech Stack: Python, Flask, SQLite, XGBoost, Scikit-learn

- Architected a machine learning system to evaluate credit applicant eligibility utilizing advanced classification models.
- Formulated comprehensive data preprocessing, feature scaling, and model evaluation pipelines to maximize performance.
- Designed an interactive Admin Dashboard facilitating real-time prediction analytics and transactional data visualization.

Smart Calculator AI

Tech Stack: Flutter, Firebase, Dart, OCR APIs

- Built a cross-platform mobile utility application incorporating an AI-powered Math Solver and OCR equation recognition.
- Integrated voice input capabilities, interactive graph plotting, currency conversion, EMI estimation, and PDF export tools.
- Configured offline mode functionality alongside real-time data synchronization utilizing Cloud Firestore.

AI-Based Fraud Detection System

Tech Stack: Python, Flask, Scikit-learn, SQLite

- Developed an anomaly detection pipeline designed to identify fraudulent financial transactions in real time.
- Constructed an administrative dashboard featuring interactive visual charts, prediction history tracking, and risk metrics.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, HTML, CSS, JavaScript

Machine Learning & AI: Scikit-learn, XGBoost, Pandas, NumPy, Data Preprocessing, Feature Engineering

Frameworks & Databases: Flask, Flutter, Firebase, Cloud Firestore, SQLite

Development Tools: Git, GitHub, VS Code, Google Cloud Run, Google Colab, Jupyter Notebook

Relevant Coursework: Data Structures, Object-Oriented Programming (OOP), Database Management Systems (DBMS)

CERTIFICATIONS

- AI & Machine Learning Internship Certification -- Innovation & Incubation Hub, MNNIT Allahabad
- Remote Sensing Techniques Online Course -- ISRO (IIRS)
- Google AI-Powered Shopping Ads Certification -- Google

ACHIEVEMENTS & LANGUAGES

Languages: English (Professional Working Proficiency), Hindi (Native)

Extracurricular: Active Participant, SRGI Hostel League (Volleyball)
